

General Practice

Real-time Health Information Exchange

Medical-Objects real-time health information exchange enables you to send referrals and automatically download correspondence directly into your practice management software, removing the need for filing, faxing and scanning. All results sent or received are delivered in real time and that means super-fast delivery.

Open your business to the Medical-Objects network and link to more health providers. When you join Medical-Objects you are automatically added to the provider directory. Not only do you get access to the directory, you also get the marketing benefits of being promoted to over **107,000** health care providers across Australia and New Zealand.

Referral Client (Coming soon)

Send Referrals (Coming Soon)

Our real-time solution allows you to send referrals directly from your practice software to Specialists, Allied Health, Hospitals and more.

Save Time

No more scanning or faxing! All correspondence received will import directly into your practice software.

Auditing

At the click of a button, you can track all correspondence sent or received via the Medical-Objects Delivery Report.

Integration

Medical-Objects integrates with the majority of GP practice software, such as: Indici, Profile, VIP.net, Medtech and more.

Save Money

GPs need only send 4 Referrals per week using Medical-Objects to break even and have the software pay for itself.

Security

All results are protected with high level encryption and security. You can be assured that your results are safe.

General Practice

Real-time Health Information Exchange
